

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 298

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Cytoskeleton Assembly in *Toxoplasma Gondii* Cell Division
- Functional Diversity of Actin Cytoskeleton in Neurons and Its Regulation by Tropomyosin
- Osteo-Haematopoietic Stem Cell Niches in Bone Marrow
- Mechanisms for Countering Oxidative Stress and Damage in Retinal Pigment Epithelium
- Genetics of Meiosis and Recombination in Mice
- Cell Biology of Ischemia/Reperfusion Injury
