

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 299

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

“Should be on the shelf of any biomedical library”

DOODY'S

“Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library.”

THE NUCLEUS

Contents include

- Origin and Differentiation of Ionocytes in Gill Epithelium of Teleost Fish
- Cellular Mechanisms for the Biogenesis and Transport of Synaptic and Dense-core Vesicles
- Effect of Viral Infection on the Nuclear Envelope and Nuclear Pore Complex
- New Insights into Cell-cycle Regulation and DNA Damage Response in Embryonic Stem Cells
- Angiogenic Effects of Erythropoietin
- Radiation Responses and Resistance
- Effects of Ethanol Exposure on Nervous System Development in Zebrafish
