

Volume 79

Advances in GENETICS

Serial Editors

Stephen F. Goodwin University of Oxford, Oxford, UK

Theodore Friedmann University of California at San Diego, School of Medicine, USA

Jay C. Dunlap The Geisel School of Medicine at Dartmouth, Hanover, NH, USA

The field of genetics is rapidly evolving, and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. **Advances in Genetics** continually publishes important, timely reviews from leaders in the field that cover a broad range of topics of interest to geneticists and their colleagues in affiliated disciplines. This volume includes articles on:

- From Pluripotency to Islets: miRNAs as Critical Regulators of Human Cellular Differentiation
- The Genetics of Dystonias
- Exome Sequencing and Advances in Crop Improvements
- Applications of Functional Protein Microarrays in Basic and Clinical Research

Praise for **Advances in Genetics**:

"Outstanding both in variety and in the quality of its contributions."—

NATURE

"Can be highly recommended to geneticists, and biologists in general...will prove to be of high importance for the development of the science of genetics."—
