

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 301

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Role of Macrophage Polarization in Tumor Angiogenesis and Vessel Normalization: Implications for New Anti-Cancer Therapies
- New Insights into Desiccation-Associated Gene Regulation by *Lilium longiflorum* ASR during Pollen Maturation and in Transgenic Arabidopsis
- Mechanisms Underlying the Initiation and Dynamics of Neuronal Filopodia: From Neurite Formation to Synaptogenesis
- Actin Isoforms in Neuronal Development and Function
- Endoplasmic Reticulum and the Unfolded Protein Response: Dynamics and Metabolic Integration
- Regulation of Blood-Testis Barrier (BTB) Dynamics during Spermatogenesis via "Yin" and "Yang" Effects of Mammalian Target of Rapamycin Complex 1 (mTOR1) and mTOR2*
- New Approaches for the Identification of Drug Targets in Protozoan Parasites
