

'Literally have never come across a book so geared towards revision at this level. The way it tackles the subject is exactly the way lecturers advise you to tackle exams for top marks. . . . An excellent revision guide—nothing else out there like it that I have found.'

Daniel Wendon (*BSc Marine Biology, University of Hull*)

'... a great learning device. The language is simple, the structure is great. The learning features are aimed at students and will definitely help them achieve their best.'

Natalie Wild (*BSc Biology, Liverpool Hope University*)

THE REVISION GUIDES THAT HELP YOU THRIVE IN THE BIOSCIENCES

The **Thrive in Bioscience** series is written to help you achieve exam success in all core areas of bioscience.

- Written by highly experienced educators to give you the best possible support during your learning and exam preparation
- A clear, bulleted presentation makes the facts quick and easy to assimilate
- Easy-to-digest artwork reinforces the key points made in the text
- Revision tips and 'Looking for extra marks?' panels show you how best to demonstrate your understanding
- In-text questions, and online conceptual maps and multiple-choice questions, help you check your understanding topic-by-topic
