

PRAISE FOR **FREAKS of NATURE**

"Blumberg takes us on a tour of real-life teratology, and how understanding abnormalities is casting new light on the relationship between the genetic and non-genetic forces that shape us all."

—Stephen Cass, *Discover*

"A fascinating pop exegesis of evo devo." —Steven Poole, *The Guardian*

"Blumberg's explanations of the factors that go into [these] deformations are gripping."

—Robert Colvile, *Daily Telegraph*

"A stimulating read."

—Rob Hastings, *Financial Times*

"Startlingly convincing."

—Elizabeth Quill, *Science News*

"A strangely poetic analysis.... If you're interested in the science behind the macabre, this book will thrill you." —Annalee Newitz, *io9*

Mark S. Blumberg is the F. Wendell Miller Professor of Psychology at the University of Iowa and currently serves as Editor-in-Chief of the journal, *Behavioral Neuroscience*.
