

"Anyone seriously interested in who
we are and how we function should read this book."

Peter Forbes, *The Guardian*

"Nessa Carey takes us on a lively and up-to-date
tour of what's known about epigenetic mechanisms and
their implications for aging and cancer."

Laurence Hurst, University of Bath, *Focus Magazine*

"[Nessa Carey's] book combines an easy style
with a textbook's thoroughness.... A bold attempt to
bring epigenetics to a wide audience."

Jonathan Weitzman, *Nature*
