Lifespan Development

Helen Bee

Experience Helen Bee's warm, personal style, accessible presentation, and balanced integration of theory and application in a text you will truly enjoy. Her student-oriented approach is supported by a number of distinctive features, including the following:

■ **Interludes.** These unique sections provide a brief review and analysis of each age period, integrating concepts across domains and stages and providing a contextualizing study tool for students.

■ **Critical Thinking questions.** These thought-provoking questions encourage students to stop and analyze material as they read, making the reading process more active and creative and encouraging lively class discussions.

■ **Cultures and Contexts.** These sections focus on cross-cultural research and applications, highlighting similarities and variations in development across cultures.

■ **Research Reports.** These sections provide detailed descriptions of high-interest research studies in an accessible format.

■ **The Real World.** This feature explores in depth the practical applications of developmental research, relating it to a wide variety of student interests.

■ **Across Development.** These sections present longitudinal studies showing the links between child and adult development and demonstrating both continuity and change across the life span.
