HIGHLIGHTS OF THE SEVENTH EDITION

- **A new chapter on Behavioral Genetics—Chapter 21**—has been added. It includes contemporary views of this exciting field as well as current research.
- **Case Studies** appear at the end of each chapter; topics include the use of triploid carp as a biological control agent to deal with aquatic vegetation overgrowth in waterways (Chapter 6) and the loss of genetic diversity in crop plants as a by-product of the Green Revolution (Chapter 24).
- **"Essential Points"** appear after key sections and summarize the chapter's 5–10 key ideas for efficient review.
- **Exploring Genomics exercises** appear in selected chapters and help you connect genetics with genomics, bioinformatics, and proteomics. Exercises direct you to explore a wide variety of online resources.

Study Guide and Solutions Manual by Harry Nickla

978-0-321-61870-2 | 0-321-61870-X

This valuable handbook provides a detailed, step-by-step solution or extended discussion for every problem in the text in a chapter-by-chapter format. It also contains extra study problems and a review of concepts and vocabulary.

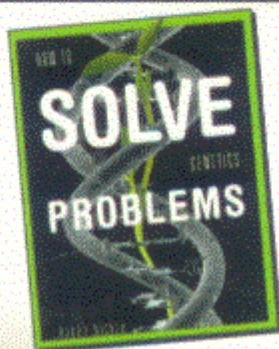

Genetics Place

The Genetics Place

www.geneticsplace.com

The Genetics Place offers tutorials, animations, quizzes, interactive exercises, and an integrated myeBook version of the complete textbook.

How to Solve Genetics Problems

by Harry Nickla

978-0-321-55693-6 | 0-321-55693-3

A supplement for any genetics textbook, this unique guide patiently directs you through the process of solving genetics problems. Using callout comments, the author shows you how to break down word problems by analyzing each sentence. At each step in the statement of a problem, you learn to evaluate the given data, think about how it fits into the larger picture, and analyze relationships that lead to a potential solution.
