

Welcome to the Second Edition of

Biolnquiry

Making Connections in Biology

Learning about living things is like piecing together a complex puzzle. *Biolnquiry: Making Connections in Biology*, a National Science Foundation—supported project (DUE #97-52454), was designed to help you assemble these pieces, to see their connections, and to reveal the beautiful and compelling pictures they create.

The text and web-based CD were developed together from the start to create an engaging, active learning experience. The Second Edition still brings you innovative presentation of the “big ideas” in biology, but also brings some important new enhancements.

- There is a new chapter on biotechnology (*Chapter 7*)
- New appendices on chemistry.
- New and exciting interactive explorations have also been added to the CD.

You'll experience for yourself the profound biological discoveries that forever changed the way we think about life.

Enjoy your explorations!
