

Paperback Re-issue

This is a companion volume to the text by A.R. Clapham, T.G. Tutin and the late E.F. Warburg. The drawings are by Sybil J. Roles.

Vol. I. Pteridophyta to Papilionaceae

Vol. II. Rosaceae to Polemoniaceae

Vol. III. Boraginaceae to Compositae

Vol. IV. Monocotyledons

These volumes illustrate the Clapham–Tutin–Warburg *Flora*, which is now the standard work. The drawings assist users of the *Flora* to recognize species by supplying a visual supplement to the text. They are from fresh specimens and deliberately aim to give an impression of the living plant. As the compilers of the *Flora* put it 'The intention is to provide a visual impression so as to assist with the appreciation of the technical descriptions given in *Flora of the British Isles* (Second Edition) and the *Excursion Flora*.' The degree to which the illustrations have been planned to supplement the *Flora* itself greatly increases their value; the books are meant to be used together.
