

The Princeton Guide to Ecology is a concise, authoritative reference to the field's major subjects and key concepts. Edited by eminent ecologist Simon Levin, with contributions from an international team of leading ecologists, this is an essential volume for undergraduate and graduate students, research ecologists, scientists in related fields, policymakers, and anyone else with a serious interest in ecology.

- Explains key topics in more than ninety concise and authoritative articles written by an international team of leading ecologists
- Contains more than 200 illustrations, including sixteen pages in color
- Includes glossary, chronology, suggestions for further reading, and index
- Covers autecology, population ecology, communities and ecosystems, landscapes and the biosphere, conservation biology, ecosystem services, and biosphere management

"Every ecology graduate student studying for their comprehensive examination needs this book. For that matter, every practicing ecologist interested in keeping up with aspects of the field, particularly outside of their own subdiscipline, would be well served to have this book on hand."

—Jonathan M. Chase, *Quarterly Review of Biology*

"[A] content-rich volume presenting the diversity of ecology, from basic to applied." —*Library Journal*

"[A] comprehensive assemblage of contemporary ecological research studies and issues related to the different disciplines of the ecological sciences. . . . Technical information throughout the book is presented in a simple-to-understand manner; a comprehensive glossary facilitates further understanding of terminology/concepts. This volume will be useful to students as well as professionals in areas related to environmental health and public policy." —*Choice*

SIMON A. LEVIN is the George M. Moffett Professor of Biology and a professor of ecology and environmental biology at Princeton University, where he directs the Center for BioComplexity. He is the author, editor, or coeditor of many books, including the *Encyclopedia of Biodiversity*. Among his many awards are the Heineken Prize for Environmental Sciences, the Kyoto Prize in Basic Sciences, the Margalef Award for Ecology, and the Eminent Ecologist Award from the Ecological Society of America.
