

PRAISE FOR THE FIRST EDITION OF *TURTLES OF THE UNITED STATES AND CANADA*

"In 1972, C. H. Ernst completed the daunting task of compiling a sequel to A. F. Carr's (1952) landmark *Handbook of Turtles*. Two decades later, Ernst, this time with assistance from former student and fellow cheloniophile J. E. Lovich, has done it again." —*Copeia*

"[A] monumental work . . . the standard reference to North American turtles for the next generation of biologists. Every serious vertebrate biologist on the continent will want a copy." —*Herpetological Review*

"The most comprehensive compilation on North American turtles ever attempted and achieved." —*Herpetofauna*
