Originally published during the early part of the twentieth century, the *Cambridge Manuals of Science and Literature* were designed to provide concise introductions to a broad range of topics. They were written by experts for the general reader and combined a comprehensive approach to knowledge with an emphasis on accessibility.

This volume contains the 1921 third edition of L. Doncaster's *Heredity in the Light of Recent Research*. It offers a contemporaneous account of the most important advances in the study of heredity during the beginning of the twentieth century.
