

Praise for *No Way Home*

"Absorbing and thought provoking. *No Way Home* deserves to be widely read and used to promote conservation action. It illustrates the importance of science for deepening our appreciation of animal migrations and for guiding our efforts to preserve them."

—*Science*

"Startling and imaginative new wildlife book. . . . Wilcove writes with a sense of drama, passion and awe for the incredible treks many animals make."

—*The Philadelphia Inquirer*

"*No Way Home* offers entrancing accounts of some of the world's iconic migrants of the sky, land, and sea while underscoring the obstacles they face in their travels."

—*Audubon*

"While many conservation biologists have observed the decline of individual migrations, Wilcove's book combines them into an alarming synthesis."

—*The New York Times*

"With no conscious effort, one emerges with the impression of having become expansively informed about the natural history of migrations, the research that has defined them, and the solutions necessary to conserve them."

—*BioScience*

DAVID S. WILCOVE is Professor of Ecology, Evolutionary Biology, and Public Affairs at Princeton University. One of the world's leading experts on endangered species, he is the author of *The Condor's Shadow: The Loss and Recovery of Wildlife in America* and numerous scientific and popular articles on wildlife conservation.
