

Applied Genetics

Trends and Techniques

Contents:

Genetically Modified Food: Growing GM Crops • Economic and Environmental Effects • Human Exposure to Pesticides Associated with GM Foods • Genetically Modified Plant • Regulation of Genetically Modified Plants • International Trade of Genetically Modified Foods • Plant Breeding • The Role of Plant Breeding in Organic Agriculture • The Non-GMO Project • Bt Brinjal

Recent Developments in Stem Cell Technology: Medical Transplantation • Xenotransplantation • Porcine Endogenous Retroviruses • Major Organs and Tissues Transplanted • Reasons for Donation and Ethical Issues • Organ Transplantation in Different Countries • All Numbers Per Million Population

The Cloning Process: Genetics • Features of Inheritance • Molecular Basis for Inheritance • Gene Expression • Genetic Change • Genetic Disorders • Single Gene Disorder • Background: Diploid, Chromosomes, Genes, Loci, & Alleles • Classification by Fitness or Trait Value • Dominant and Recessive Genetic Diseases in Humans • Huntington's Disease Clinical Research

Introduction to Genetics: History of Genetics • Charles Darwin • Modern Development of Genetics and Heredity • Plant Systematics and Hybridisation • History of Plant Systematics

Principles of Genetics: The Nature of the Gene • Physical Definitions • Genetic and Genomic Nomenclature • DNA • Chemical Modifications • DNA-modifying Enzymes

Genetics and Society: Genetic Inequality: Human Genetic Engineering • Confounding Circumstances of DNA Profiling • Paternity Testing: Blood Types and DNA • The Ability to Manipulate DNA Has Led to a New Genetics • Biotechnology is Producing a Scientific Revolution...

About the Editor

Mark Whelan has built a multifaceted career around communicating the excitement of life science, especially genetics and biotechnology. He earned his Ph.D. in genetics in 1994 from Indiana University. He is Contributing writer of various science newspapers read by scientists worldwide, he writes frequently on the latest research and news in biotechnology. Since 1995, he has published more than 800 articles in a variety of magazines since 2005, he helps people make decisions about reproductive choices.
