

High-quality research articles on proteomic analyses of microbial pathogens, made available in a handy form. Containing proven, high-quality research articles selected from the popular PROTEOMICS journal, this is a current overview of the latest research into the proteomics analysis of microbial pathogens as well as several review articles.

***Peter R. Jungblut** is the head of the Department of Protein Analysis, a core facility of the Max-Planck-Institute for Infection Biology in Berlin, Germany. By classical proteome analysis, his group generated a proteomic database with about 1500 identified proteins. He is a member of the Leopoldina, a fellow of the American Academy of Microbiology, as well as member of numerous scientific societies and academic bodies. In 2005 he was elected as the Vice Chair of the International Union of Microbiological Societies.*

***Michael Hecker** is a biologist and became Professor in 1986 at the Ernst-Moritz-Arnd University in Greifswald, where he is also director of the Department for Microbial Physiology and Molecular Biology. He is a member of the Leopoldina, as well as member of numerous scientific societies and academic bodies. He has published more than 120 scientific articles.*
