

Pierre Pontarotti (Ed.)

Evolutionary Biology

Since 1997, scientists of different disciplines sharing a deep interest in concepts and knowledge related to evolutionary biology have held the annual *Evolutionary Biology Meetings* in Marseille in order to discuss their research and promote collaboration. Lately scientists especially focusing on applications have also joined the group.

This book starts with the report of the 12th *Evolutionary Biology Meeting*, which gives a general idea of the meeting's epistemological stance.

This is followed by 22 chapters, a selection of the most representative contributions, which are grouped under the following four themes:

- Part I Concepts and Knowledge
- Part II Modeling
- Part III Applied Evolutionary Biology
- Part IV Applications in Other Fields

Part IV transcends the field of biology, presenting applications of evolutionary biology in economics and astronomy.
