

MACROECONOMIC DYNAMICS

Notes for Contributors

Contributions. Contributions are welcome from all countries. They should be written in English.

Aims and Scope/Editorial Policy. *Macroeconomic Dynamics* will publish research of the highest theoretical, empirical or quantitative sophistication. Papers of high quality are welcomed from all areas of Macroeconomics and from all parts of the world, as long as the research is founded in a rigorous scientific approach. Major advances in Macroeconomics without immediate policy applications will also be accepted, if they show potential for application in the future. Occasional book reviews, announcements, conference proceedings and interviews will also be published. An electronic version of the journal will be published simultaneously with the paper version enabling immediate access to the best current research in Macroeconomics.

Home Page. The journal has a home page on the web which is a source of further information about the journal. The location of the home page is: <http://barnett.wustl.edu/MD.html>. Information about *Macroeconomic Dynamics* may also be viewed at www.journals.cambridge.org.

Manuscripts. The submission procedure for this journal has been converted to electronic uploading of pdfs to the journal's server. To submit, follow the instructions provided at http://econ.tepper.cmu.edu/md/electronic_submission.htm. Questions about the submission procedure can be transmitted to the Editorial Information System Manager, Stephen Spear, at ss1f@andrew.cmu.edu, or to the Editor, William A. Barnett, at barnett@ku.edu.

Originality and Copyright. Manuscripts are accepted for review on the understanding that the same work has not been and will not be published nor is presently submitted for publication elsewhere. While under editorial review, it is the responsibility of the authors to keep the Editor informed about submissions, publication plans, and actual publication of related research or abstracts thereof in other outlets, including letters, journals, review publications, journals in other disciplines, conference proceedings, and published dissertations. It is further understood that all persons listed as authors have given their approval for the submission of the paper and that any person cited as a source of personal communication has approved such citation; written authorisation may be required at the Editor's discretion. Authors are responsible for obtaining written permission to publish material for which they do not own the copyright. A Copyright Transfer Agreement, with certain specified rights reserved by the author, must be signed and returned to the Editor by a senior author of accepted manuscripts, prior to publication. This is necessary to enable the publisher to ensure the wide distribution of the author's(s') work and the protection of both the author and the publisher under copyright law. Articles

and other material published in *Macroeconomic Dynamics* represent the opinions of the authors and should not be construed to reflect the opinions of the Editor, Advisory Board, Editorial Board, or the Publisher.

Preparation of a Manuscript. The entire manuscript (including notes and references) should be produced as double spaced typescript on $8\frac{1}{2} \times 11$ -inch or A4 white paper, with wide margins to accommodate copyediting. The manuscript should be converted to a pdf for submission by uploading to the journal's server. Pages should be numbered consecutively. Page 1 should provide the article title, author's(s') names (in the form preferred for publication, complete affiliation, phone, fax and e-mail numbers (if available)). At the bottom of Page 1 place any footnotes to the title or authors, indicated by superscripts*, **, etc. Page 2 should contain a proposed running head (abbreviated form of the title) of up to 40 characters, and the name and mailing address, telephone, fax and e-mail numbers of the author to whom proofs should be sent. Page 3 should contain a short abstract of the paper in less than 150 words. The abstract will appear at the head of the article when published in the journal. A list of three or four keywords or terms should also be included. The full text of the manuscript should begin on Page 4.

Equations. All equations should be typewritten and the numbers for displayed equations should be placed in parenthesis in the right margin. References to equations should simply use the form "(3)." Superscripts and subscripts should be typed clearly above and below the line, respectively. Theorem, lemma, and proposition statements should appear in italic print. End-of-proof signposts should appear as such: either ■ or Q.E.D., typed in italics. Authors are encouraged to use the following order for parentheses: {[(...)]}.

Tables and Figures. Tables and figures should be numbered consecutively in a separate set of pages and marked on the reverse of the originals and copies with the first author's name, the figure number and its orientation. Every table or figure should have a title or caption and at least one reference in the text to indicate its appropriate location. Figures (charts, graphs, or other artwork) should be ready for photographic reproduction or scanning; they cannot be redrawn by the printer. Computer generated figures are acceptable if printed out using a laser printer with a resolution of at least 600 dpi on high quality paper. Tints should be avoided and hatching used when possible. All figure labels and details should be clearly printed and large enough to remain legible after a reduction to half size. As a guide no character should be less than 1 mm wide after reduction.

References. References should be cited in the text by the author's last name and the date of publication. Complete bibliographic information for each citation should be

included in the list of references. References should be typed in alphabetical order in the style of the following examples:

Monograph:

Stokey, Nancy L. and Robert E. Lucas, Jr. with Edward Prescott (1989) *Recursive Methods in Economic Dynamics*. Cambridge, MA: Harvard University Press. *Chapter in an Edited Volume:*

Danthine, Jean-Pierre and John B. Donaldson (1995) Computing equilibria of nonoptimal economies. In Thomas F. Cooley (ed.), *Frontiers of Business Cycle Research*, pp. 65-97. Princeton: Princeton University Press.

Journal Article:

Epstein, Larry G. and Stanley Zin (1989) Substitution, risk aversion and the temporal behavior of consumption and asset returns I: a theoretical framework. *Econometrica* 42, 937-969.

Article in Press:

Huang, He, Selahattin Imrohoroglu, and Thomas J. Sargent (in press) Two computational experiments to fund Social Security. *Macroeconomic Dynamics*.

Journal names should not be abbreviated.

Footnotes. Where more than a simple source citation is called for, footnotes may be used. These should be numbered consecutively throughout the text and typed together at the end of the paper before the references. Source citations within footnotes follow the same style as citations within the text.

Data and Software Archive. On acceptance of their paper, authors must submit a complete set of any data (in ASCII format) used in the paper. Computer code necessary to run a commercial program (e.g., SAS, LIMDEP, etc.) or the source code of a non-commercial program must also be submitted. What is necessary differs with each paper but the results of the paper must be capable of replication given access to any commercial program used to obtain the results. The data, computer programs, and code will be maintained in the *Macroeconomic Dynamics* data archive, which is linked to the journal's home page at MD.html. Guidelines for users of this archive are online and linked to the archive and to the journal's home page. The Data and Software Archive Coordinator, Robert Parks, can be reached by e-mail at: bparks@wuecona.wustl.edu.

Copyediting and Proofreading. The publisher reserves the right to copyedit and proofread all articles for publication, but the corresponding author will receive page proofs for final proofreading. These should be checked and returned within five days of receipt. The publisher reserves the right to charge authors for excessive correction of non-typographical errors.

Offprints. The corresponding author will receive 25 free offprints of their article free of charge; additional numbers may be purchased if ordered at proof stage (an order form will be sent with proofs).
